

MICC PRODUCT APPLICATION, PROCESS AND DILUTION RATIOS

Product Overview

This leaflet provides a comprehensive guide to using the MICC range of car detailing products. Follow these instructions carefully to achieve optimal results. All dilutions are with water unless otherwise specified.

PRODUCT APPLICATION ORDER

1: Hero Wheel Cleaner (Concentrate)

Application: Apply via foam cannon, pump sprayer or trigger sprayer.

Process: Spray onto wheel liberally.

Agitate with a brush and leave to dwell for 30 seconds, then rinse away

Dilution:

Lightly soiled

100ml product, 400ml water.

Heavily soiled

200ml product, 400ml water.

2: Citrus Pre-Wash (Concentrate)

Application: Apply via foam cannon, pump sprayer or trigger sprayer.

Process: Apply to the lower half of your vehicle all the way round. Leave to dwell for a few minutes and then rinse away.

Do NOT let it dry before rinsing

Dilution:

Lightly soiled

100ml product, 400ml water.

Heavily soiled

200ml product, 400ml water.

3: Igloo Pro Snowfoam

Application: Apply via foam cannon.

Process: Spray all over your vehicle leaving a thick blanket of foam. Allow to dwell for 3-5 minutes and then rinse off.

Dilution:

100ml product, 800ml water.

4: Prestige Shampoo

Application: Bucket and Mitt or Cannon and Mitt

Process: Once your initial decontamination rinse is complete, using your wash mitt, gently pass this over your panels with Prestige Shampoo, as your contact wash. Once complete, thoroughly rinse your vehicle with water.

Dilution:

Bucket

100ml product, 25 litres water.

Cannon

50ml product, 200ml water.

5: Luxury Blue Lagoon Shampoo

Application: Bucket and Mitt or Cannon and Mitt

Process: Once your initial decontamination rinse is complete, apply liberally with a clean wash mitt over the entire vehicle. Once complete, thoroughly rinse your vehicle with water and dry immediately.

Dilution:

Bucket

100ml product, 25 litres water.

Cannon

100ml product, 250ml water.

6: Tar Remover

Application: Spray directly from the MICC bottle.

Process: Spray Tar Remover onto the contaminated area. Leave for 1-2 minutes to allow the product to penetrate the tar or contamination. Wipe away with a clean microfibre cloth.

Dilution:

Ready to Use

7: Fallout Remover

Application: Spray directly from the MICC bottle.

Process: Ensure your vehicle has been washed and dried. Spray Fallout onto all the panels and wheels - leave for 2-3 minutes

(Do NOT let it dry)

If any of your panels "bleed red" then there is contamination and you will need to use a Clay Sponge or Clay Bar over that area. Before using a Clay Sponge or Bar, rinse the Fallout Remover away with water.

Dilution: Ready to Use

8: Old School Detailer

Application: Clean microfibre cloth.

Process: Spray liberally onto a clean microfibre cloth. Apply to one panel at a time.

Wipe over the panel - leave for 30 seconds and then buff away.

Dilution: Ready to Use

9: Bananarama Spray Wax

Application: Clean microfibre cloth.

Process: Spray liberally onto a clean microfibre cloth. Apply to one panel at a time.

Wipe over the panel - leave for 30 seconds and then buff away.

Dilution: Ready to Use

10: Show Gloss Enhancer

Application: Clean microfibre cloth.

Process: Spray liberally onto a clean microfibre cloth. Apply to one panel at a time.

Wipe over the panel - leave for 30 seconds and then buff away.

Dilution: Ready to Use

11: Lovely Jubbly Ceramic Detailer

Application: Clean microfibre cloth.

Process: Spray liberally onto a clean microfibre cloth. Apply to one panel at a time.

Wipe over the panel - leave for 30 seconds and then buff away.

Dilution: Ready to Use

12: Repel Glass Cleaner

Application: Clean microfibre cloth.

Process: For best results make sure the glass has been decontaminated, then spray onto a clean microfibre cloth and apply in a circular motion.

Leave for 30 seconds and wipe away with another clean microfibre cloth.

Tip: Apply to the windscreen twice

Dilution: Ready to Use

13: Spritz Glass Cleaner

Application: Clean microfibre cloth or Glass cloth.

Process: Spray onto a clean microfibre cloth and apply in an up and down, then side to side motion.

Use a clean microfibre cloth to buff away.

Dilution: Ready to Use

14: Glass Sealant

Application: Pad as supplied and a clean microfibre cloth.

Process: For best results make sure the glass has been decontaminated. Mist the supplied applicator then apply it to your glass in an up and down and side to side motion.

Leave for 5 minutes before buffing away with a clean microfibre cloth.

Tip: Apply to the windscreen twice

Dilution: Ready to Use

15: Banish Fabric and Leather Cleaner

Application: Stiff and soft bristle brush. Remove with Wet Vac or microfibre.

Process: Spray onto designated area. *For Fabric* - use a stiff bristle brush to agitate. You can either use a Wet Vac to remove the product or a clean microfibre cloth.

For Leather - use a soft bristle brush and wipe with a clean microfibre cloth.

Dilution: 100ml Product to 400ml Water

16: Finish**Interior Detailer**

Application: Apply to faded trim.

Process: Allow to dry, reapply if necessary.

Dilution: Ready to Use

17: APC**all purpose cleaner**

Application: Spray bottle, medium bristle brush and a microfibre cloth.

Process: Spray onto designated area. Agitate with medium bristle brush, then wipe with microfibre cloth.

Dilution: 100ml product to 400ml water

18: Trim Restorer

Application: Microfibre pad and microfibre cloth.

Process: Make sure the designated area is fully clean. Put a small amount of the product onto a microfibre pad and spreads evenly side to side and up and down. Wipe away any excess with a microfibre cloth.

Tip: Use a hairdryer to gently warm the area after application for a longer lasting effect.

Dilution: Ready to Use

19: Satin Rose Tyre Shine

Application: Tyre sponge and microfibre pad

Process: Make sure the tyre has been thoroughly cleaned before applying Satin Rose

Tip: Leave overnight to dry if possible.

Dilution: Ready to Use

20: Endurance Tyre Shine

Application: Tyre sponge and microfibre pad

Process: Make sure the tyre has been thoroughly cleaned before applying Satin Rose

Tip: Leave overnight to dry if possible.

Dilution: Ready to Use
